Smart Air-Conditioner User Manual

Smart Air Conditioner can be operated and controlled by using your smart phone even when you are away from your home.

What do you need?

- Smart Air Conditioner.
- Wi-Fi router with internet connectivity of at least 2 Mbps.
- Ensure to have a strong Wi-Fi signal where your Air Conditioner is installed.
- Smart Air Conditioner Wi-Fi operates in the 2.4 GHz band.
- Smart Phone with an active mobile number (for Example - +91- 1234 567 890) for registration purpose.

How to get the (Android / iOS based) Smart Home+ Application?

1. Download the "SmartHome+" application from Apple App Store or Google Play Store.
2. "SmartHome+" application supports from iOS version 12 and Android version 6 onwards.

How to register as a user?

1. Launch Application and press Sign Up button.

2. Enter a valid mobile number and click on Generate OTP Button.

3. An OTP shall be received via text message on entered phone number.

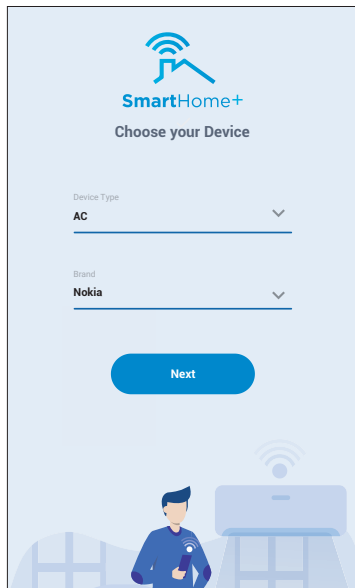

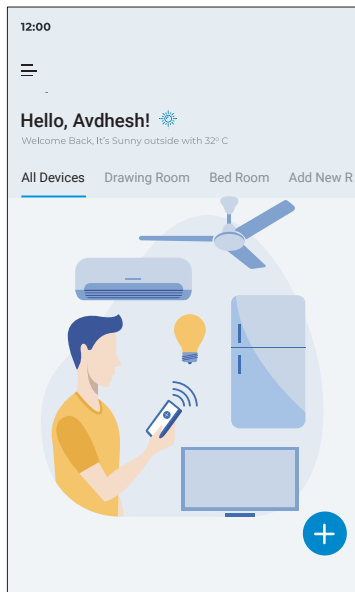

4. Enter your name, e-mail address and create a Password of 8 character or more. Then, click on 'Signup' button.

Congratulations! You have now registered as a user in the Smart Home+ application. Let us setup your Air Conditioner to this application

How to add your Smart Air-Conditioner to the SmartHome+ Application.

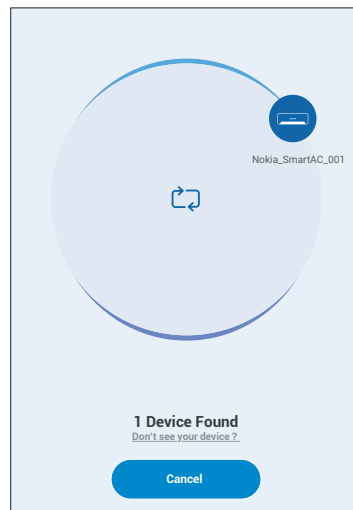

1. Click on “ + ” in the app dashboard and select “Nokia” from available device and press the “Next” button.

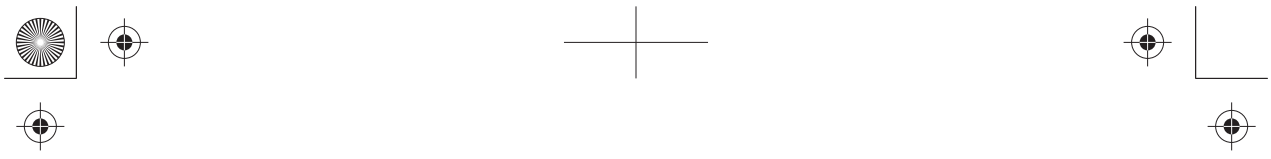

2. Press “  ” button on remote until the Wi-Fi () Indicator on AC display starts blinking. ‘SE’ will be displayed, showing that the ac is in setup mode. Click on Done button.

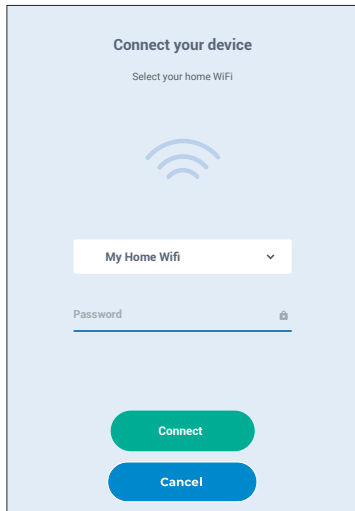

3. **Android** : Choose the AC that needs to be setup.
iOS : Connect to the access point that has prefix “NOKIA” from the Wi-Fi settings page.

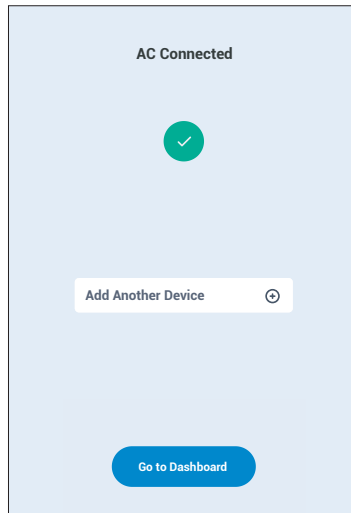

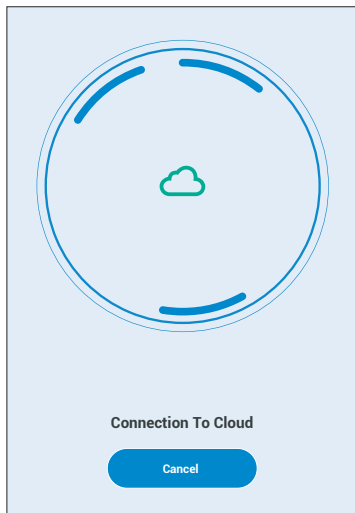

4. Choose available Wi-Fi network (for example My Home WiFi) and enter the password.
This information will be passed to the AC to connect to your home Wi-Fi network.

6. Upon successful completion, press "Go to Dashboard" to view and control the Air Conditioner.

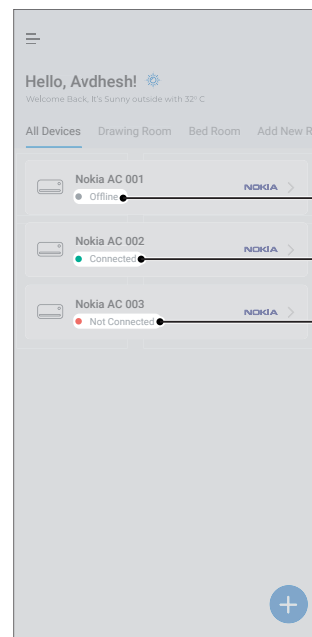

5. SmartHome+ App will setup the Air conditioner and connect to server.

Disclaimer :

All features of Remote may not work with WiFi, they are specific to respective models and subject to change without notice.

Smart Air-Conditioner with Google Assistant

Steps to enable Google Assistant to control Smart Air Conditioner:

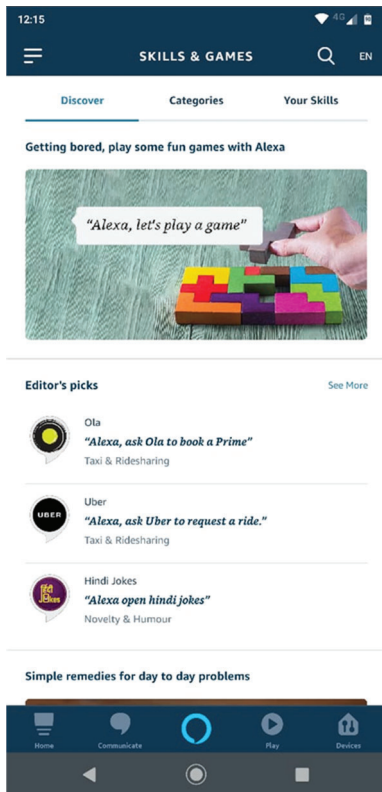

1. From the Google Home app, select link **SmartHome+** account.
2. Provide the **SmartHome+** app user-name and password in the **SmartHome+** Identity Server page.
3. Your Smart Air conditioner will now appear under devices in Google Home Application
4. Google Assistant can now be used to control your Air Conditioner through voice commands.

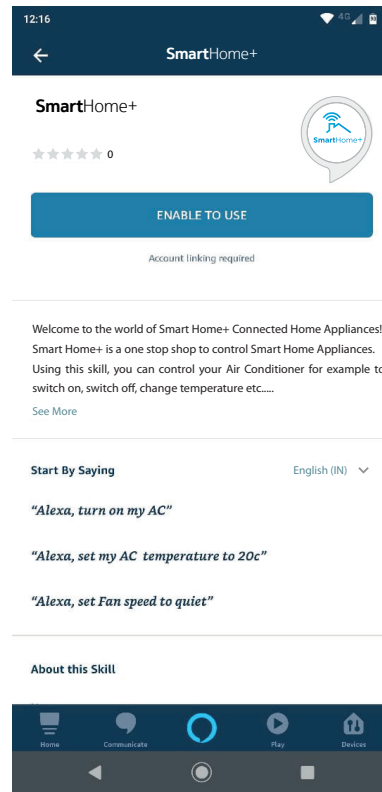

Smart Air-Conditioner with Amazon Alexa

Steps to enable Amazon Alexa to control Smart Air Conditioner:

1. Open the Amazon Alexa App and search for **SmartHome+** skill.

2. Enable **SmartHome+** skill.
Provide the **SmartHome+** app user-name and password in the **SmartHome+** Identity Server page.

Your Smart Air-conditioner will now appear under devices in Amazon Alexa App. Amazon Alexa can now be used to control your Smart Air-Conditioner through voice commands.

Troubleshooting

S.No.	Problems	Solutions
1.	I could not see my Air Conditioner when I try to add to SmartHome+ application.	Ensure that you have pressed the “  ” button until the Wi-Fi indicator on the AC is blinking.
2.	I could not connect my Air Conditioner with Wi-Fi network.	Retry the process mentioned on page no.-3. If the problem persists, contact customer support.
3.	I would like to know the status of Wi-Fi connectivity of my Air Conditioner.	Press “  ” button for 5 seconds on Remote Control. Error code status will be shown on AC display. Use the “Diagnose” option in “ SmartHome+ ” application (Go to AC Details page and then select “Manage Device” in the title bar) for next steps.
4.	I am not able to change settings of my Air Conditioner from my mobile application.	Press “  ” button for 5 seconds on Remote Control. Status will be shown on AC display. Use the “Diagnose” option in “ SmartHome+ ” application for next steps.
